

INSTRUCTION FOR OFFICE BANKING INSTALATION

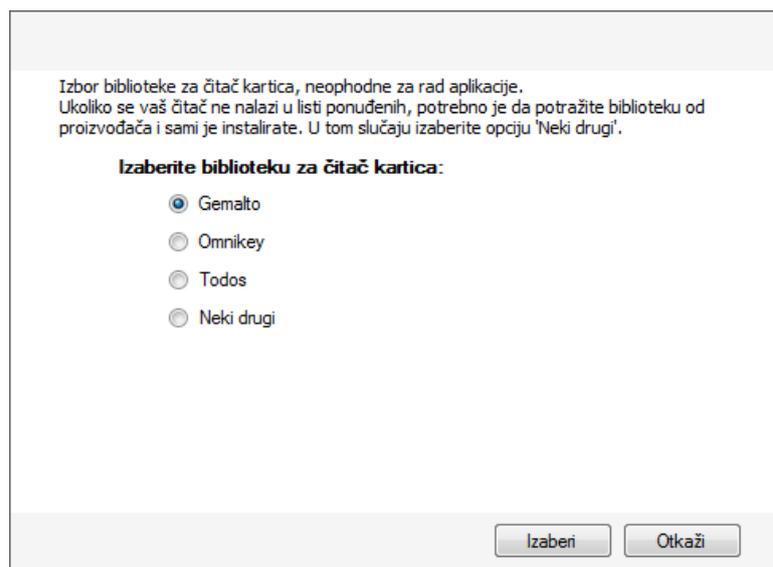

- Start **Start-up** icon from the installation disc

- If the system lacks the necessary components to operate the application, the installation required will automatically launch.
- The installation wizard will then offer you a choice to install libraries (drivers) for card reader:

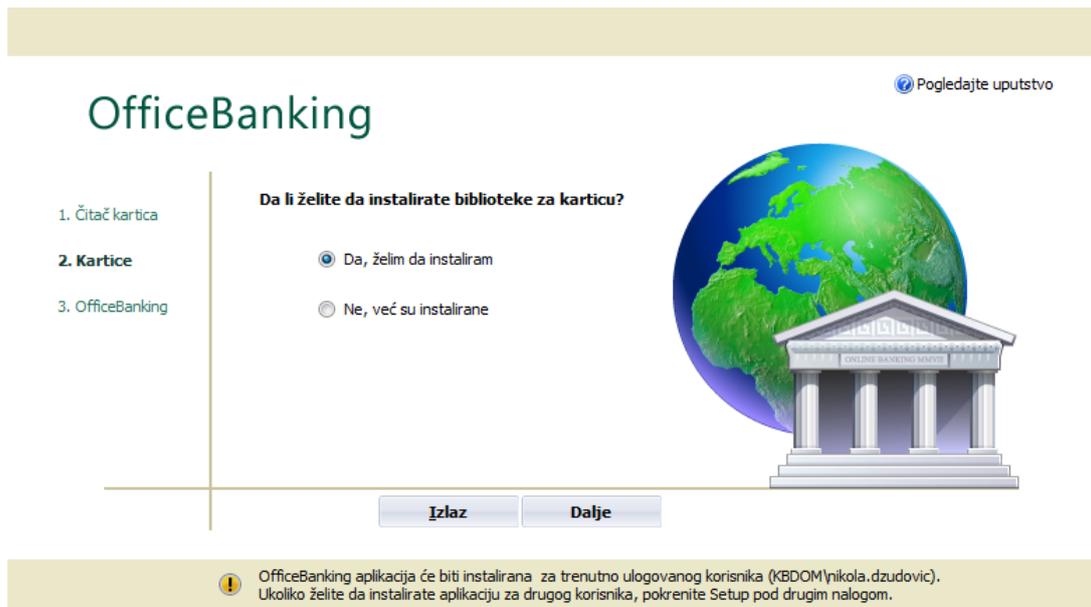

- If the reader installed on your system, select No, *I already have installed* and then click **Next**.
- If the reader is not installed on your system, select **Yes, I want to install** and then click **Next**. A window opens with a selection of libraries for reader models in common use. You can select the model and click Select to start the installation library.

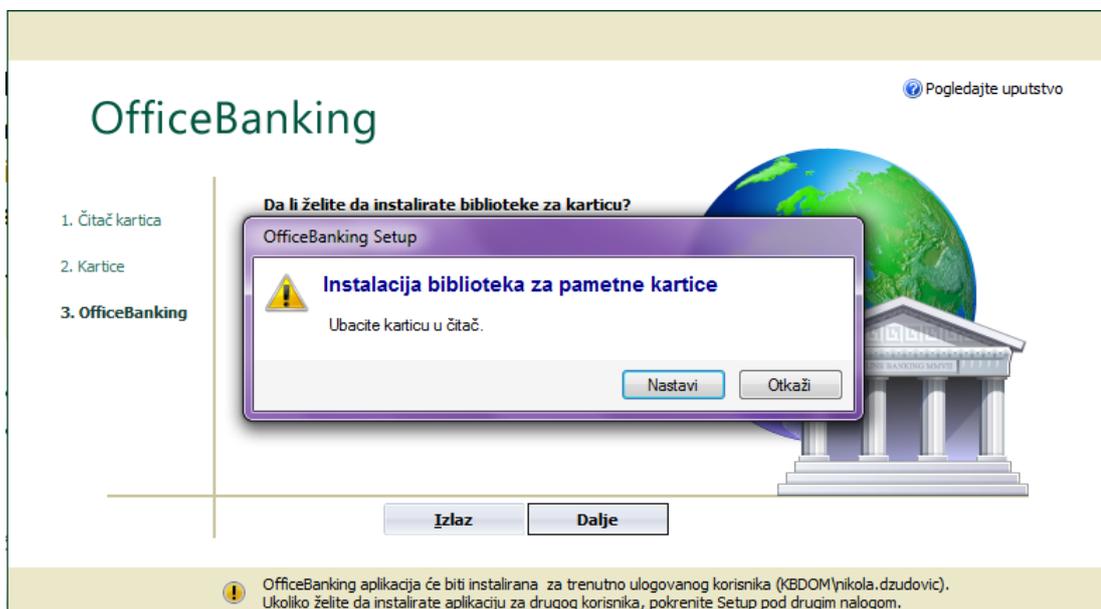

Note: Komercijalna Banka currently distributes Gemalto reader with the Office iBank so if you get the same from us select this option on the list.

- In the next step, the wizard gives you the option to install a library card.

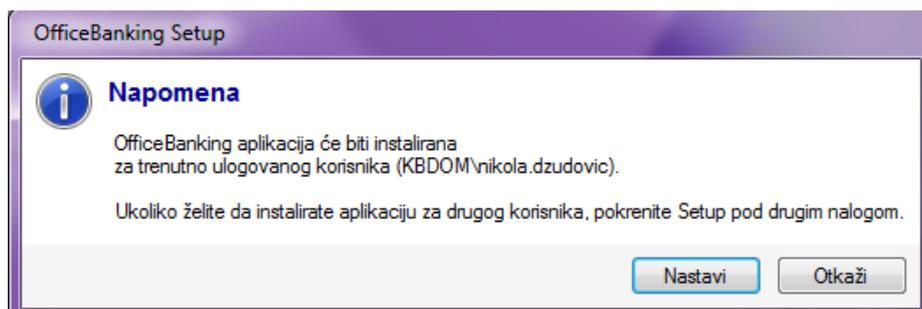

- If libraries are installed on the system, select *No, I already have installed* and click *Next*.
- If the libraries are not installed on the system, select *Yes, I want to install* and click *Next*. An alert will appear to insert the card into the reader. If you inserted the card, click *Continue*, and then installation of libraries designed for your card will commence.

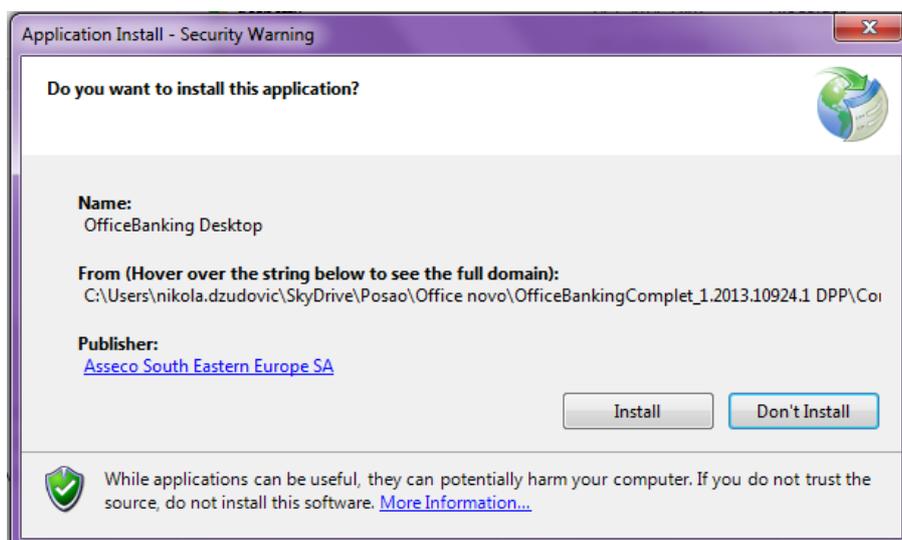

- In the next step wizard gives you a choice between Desktop and Enterprise versions of OfficeBanking applications. Select the version and click *Next*.

- When you choose the version, an alert will appear telling you that the application will be installed only for the computer user who is currently logged on to the system. Click *Continue*.

- Now the installation application window will appear; click Install. After this step will the installation will be executed and you can run the program

- When the installation is complete, the application with a card signup form will be launched. You need to enter a pin and click *Next*.
