KOMERCIJALNA BANKA A.D. BEOGRAD

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheet of Komercijalna banka a.d. Beograd (hereinafter: the Group) as at 31 December 2008 and the related consolidated statement of income, consolidated cash flows and consolidated changes in shareholders equity for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Law on Accounting and Auditing of the Republic of Serbia (as published in the "Official Gazette of the Republic of Serbia" 46/2006), Banks Law ("Official Gazette of the RS", no. 107/2005) and other relevant by-laws issued by National Bank of Serbia. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatements, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We have conducted our audit in accordance with the Law on Accounting and Auditing of the Republic of Serbia (as published in the "Official Gazette of the Republic of Serbia" 46/2006) and International Standards on Auditing as issued by the International Federation of Accountants as well as in accordance with the Decision on External Audit of Banks. Those standards require that we comply with relevant ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting principles used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

Upisani osnovni kapital Društva od EUR 50.790,42 uplaćen, odnosno unet je u celosti. KPMG d.o.o. Beograd je jednočlano društvo.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2008, and the results of its operations and cash flows for the year then ended, in accordance with the Law on Accounting and Auditing of the Republic of Serbia (as published in the "Official Gazette of the Republic of Serbia" 46/2006) and Banks Law ("Official Gazette of the RS", no. 107/2005) and relevant National Bank of Serbia's by-laws.

Somercijalna banka ad beograd

Belgrade, April 2009

TRANSLATION

1. BANK'S ESTABLISHMENT AND BUSINESS ACTIVITIES

Komercijalna banka AD, Beograd (hereinafter: the Parent Bank) was originally established on 1 December 1970, and subsequently reorganised and transformed into a shareholding company on 6 May 1992.

The Bank's shareholders, with the most significant participation in the ordinary share capital, are presented as follows:

| Republic of Serbia | 42.60% |
|--|--------|
| EBRD, LONDON | 25% |
| ARTIO INT. EQUITY FUND, New York | 4.82% |
| Jugobanka AD Beograd under bankruptcy | 3.69% |
| INVEJ DOO, Beograd | 3.57% |
| Kompanija Dunav, Beograd | 3.55% |
| Evropa osiguranje AD Beograd under liquidation | 2.98% |

The Parent Bank has three subsidiaries with the following equity participations:

- 100% - Komercijalna banka AD Budva, Montenegro

- 100% - Kombank invest AD, Serbia

- 99.99 % - Komercijalna banka AD Banja Luka, Bosna and Herzegovina.

The minority interest in Komercijalna banka AD Banja Luka of 0.01% is held by the Export Credit Agency from Belgrade.

Consolidated financial statements represent financial reports of Komercijalna banka AD Beograd as the parent bank, of Komercijalna banka AD Budva, Komercijalna banka AD Banja Luka, and Kombank Invest AD Serbia (hereinafter: the Group).

Komercijalna banka AD Budva was founded in November 2002 as an affiliate of Komercijalna banka AD Beograd and was registered in the central register of the Commercial Court in Podgorica on 6 March 2003.

Komercijalna banka AD Banja Luka was founded in September 2006 and on 15 September 2006 was registered in the court register of the Fundamental Court in Banja Luka.

Kombank invest AD Serbia was founded in December 2007 and was registered on 5 February 2008.

The Group's activities include credit, deposit and guarantee operations, and domestic and foreign payment operations in compliance with the Law on Banks, and organizing and managing investments funds operations. The Group operates in compliance with the principles of liquidity, security and profitability.

As at 31 December 2008 the Group consists of the Belgrade headquarters at Svetog Save 14, the headquarters of Komercijalna banka AD Budva in Budva, the headquarters of Komercijalna banka AD Banja Luka in Banja Luka, the headquarters of Kombank Invest AD Belgrade, 40 branches and 283 sub-branches located throughout the Republic of Serbia, Montenegro and Bosnia and Herzegovina. The Parent Bank has representative offices registered in Frankfurt am Main, Germany and in Zagreb, Croatia.

As at 31 December 2008 the Group had 3,444 employees (31 December 2007: 3,249 employees).

2. BASIS OF PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS

In 2008 Group members kept their business records and prepared their stand alone financial statements in accordance with local statutory regulations, and other legislation based on International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS), as well as in compliance with regulations prescribed by respective central banks. Stand alone financial statements have been reviewed by an external auditor who issue an unqualified opinion, in accordance with local statutory regulations.

Stand alone financial statements of subsidiary banks were adjusted for financial statement presentation based on accounting regulations effective in the Republic of Serbia for the purpose of preparing the consolidated financial

Functional currencies, EUR for the financial statements of Komercijalna banka AD Budva and BAM for the financial statements of Komercijalna banka AD Banja Luka, are converted into the presentation currency, which is the functional currency of the Parent Bank – dinar (RSD), using officially released foreign currency exchange rates in the Republic of Serbia.

The balance sheet assets of Komercijalna banka AD Budva amount to 3.83% of the total balance sheet assets of the consolidated balance sheet. The balance sheet assets of Komercijalna banka AD Banja Luka amount to 5.33% of the total balance sheet assets of the consolidated balance sheet. And the balance sheet assets of Kombank Invest AD Serbia amount to 0.01% of the total balance sheet assets of the consolidated balance sheet. The operating expense of representative offices abroad are disclosed in the Group's financial statements.

The Group's financial statements are presented in Dinars (RSD), rounded to the nearest thousand. Dinars (RSD) are the official currency for reporting in the Republic of Serbia and the functional currency of the Parent Bank. The accompanying financial statements are presented in the format prescribed under the "Guidelines on the Prescribed Form and Content of the Financial Statements of Banks and Other Financial Organizations" (Official Gazette of the Republic of Serbia 74/2008, 3/2009 and 12/2009).

During consolidation all related party transactions were eliminated from the balance sheet in the amount of RSD 4,018,003 thousand. Income from related party transactions was eliminated from the income statement in the amount of RSD 198,414 thousand, and expenses were eliminated in the amount of RSD 78,921 thousand (Note 52).

The income statement and cash flow statement were reclassified using the average exchange rate in the Republic of Serbia for 2008 in the amount of RSD 81.0050 for one EURO and RSD 41.4199 for one BAM, while the remaining financial statements (balance sheet, statement of changes in equity and statistical annexes) were reclassified using closing exchange rates as at balance sheet date of RSD 88.6010 for one EURO and RSD 45.3010 for one BAM.

The consolidated financial statements relating to the period 1 January – 31 December 2008 were approved by the Bank's Board of Directors on 27 April 2009.

TRANSLATION

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1. Interest income and expense

Interest income and expenses, including the penalty interest and other income and expenses arising on the interestbearing assets and liabilities, are recognized in the income statement on an accruals basis. Interest is calculated in accordance with the terms defined in the agreements with lenders and borrowers.

Income from loan approval commission is recorded as deferred income, and is recognized under interest income of the period (EIR) in proportion to period of loan usage. Income from loan approval commission is presented as correction of actual returns on loan investments.

Interest income also includes income arising on risk hedging instruments, mostly by linking payments to the dinar exchange rate with respect to EUR, or retail price index. Income arising on risk hedging instruments is calculated at the end of each month during the repayment period, as well as at the date of payment.

3.2. Fee and commission income/expenses

Fee and commission income and expenses are recognized in the income statement on an accruals basis.

3.3. Income and expenses from securities

All realized or unrealized gains from changes in the market value of held for trading are charged to income or expenses in the income statement.

Securities held to maturity are stated at amortized cost. Gains and losses arising on changes in amortized value of securities held to maturity are credited to income or charged to expenses.

Securities available for sale are measured after initial recognition at fair value, based on current market prices. Changes in the market value of financial asset available for sale are charged to equity (revaluation reserves) till the moment of securities sale, when they are recognized as income or expenses.

Dividends received in respect of investments in shares of other legal entities are disclosed as income from dividends at the moment of their collection.

With regards to investments in securities of entities which are not quoted on the stock exchange, members of the Group make provisions for the estimated amount of risk.

3.4. Foreign exchange translation

Transactions in foreign currencies are translated into functional currencies at the foreign exchange mid rate set by the interbanking foreign currency market ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies as at balance sheet date are translated into functional currencies at the foreign exchange mid rate set by the inter-banking foreign currency market ruling as at that date.

Net foreign exchange gains or losses arising on foreign currency transactions and on translation of balance sheet items denominated in foreign currency are reported in the income statements as foreign exchange gains or losses.

Contingent liabilities and commitments denominated in foreign currency as at balance sheet date are translated into functional currencies at the foreign exchange mid rate set by the inter-banking foreign currency market ruling as at that date.

TRANSLATION

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3.5. Property and equipment, investment property and intangible assets

3.5.1. Property and equipment and intangible assets

Property and equipment and intangible assets are initially recognized at purchase price or cost. For subsequent measurement the Group uses the revaluation method for property, and the purchase value method for equipment.

The fair value of property is evaluated by an independent and certified appraiser. The revaluation is performed regularly, so that the book value does not differ from fair value. Gains from revaluation of property are recognized within equity as revaluation reserves. Losses from revaluation of property are charged against revaluation reserves, arising from revaluation of property. If the reserves are inadequate, the difference is charged to expenses in the period when occurred.

Depreciation is calculated on the cost or the revalued amount of property, equipment and intangible assets on a straight line basis using prescribed annual rates determined by the Group, so that the cost or the revalued amount of assets, after deducting of residual value, are fully depreciated during its useful life.

| Intangible assets | 20%-33.34% |
|--|--------------|
| Buildings | 2.50% |
| Investment property | 2.50% |
| Computers | 25% |
| Furniture and other equipment | 6.7%-25% |
| Investments in other entity's fixed assets | 8.64%-75.18% |

Property, equipment and intangible assets are depreciated from the month when put into use. In accordance with internal regulations of the Group, the residual value of properties is deemed to be equal to 30% of its initial value. Residual values are not depreciated.

Depreciation rates and estimated remaining useful life are verified or reviewed annually for depreciation that adequately reflects the actual usage of these assets in the business operations of the Group's members.

3.5.2. Investment property

Investment property is property held to earn rentals or for capital appreciation or both. For subsequent measurement of investment property, the Group uses the fair value model. Investment property is depreciated at annual rate of 2.5%.

3.6. Inventories

3.6.1. Inventories are stated at the lower of cost and net realisable value.

Inventories include assets acquired by way of collecting receivables.

3.6.2. Non-current assets held for sale represent non-current assets whose book value will be recovered principally through a sale transaction rather than through continuing use.

Non-current assets held for sale are stated at the lower of its book value and fair value less selling costs.

TRANSLATION

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3.7. Loans

Loans are stated at the amount of principal outstanding, less allowances for impairment, which are based on an evaluation of specifically-identified exposures and also cover losses that are inherent in the Group's loan portfolio. Management applies methodology based on fully application of IAS 39, in its evaluation of the risks and resulting estimations of the allowances (Note 3.8).

For the purpose of determining amortized cost or fair value of loans and advances originated by the Group, based on IAS/FIRS, the net present values of future cash flows are discounted at the contractual interest rate, decreased for repaid principle.

Loans, which are disbursed in Dinars and index-linked to the foreign exchange rates of EUR or other foreign currencies or to changes in the retail price index, are revalued in accordance with the provisions stated under the individual loan agreements. A difference between the nominal value and the revalued value of the outstanding principle is disclosed under loans and advances. The effects of such revaluation are included under gains and losses on the valuation of financial assets.

3.8. Allowances for Impairment and Provisions for Contingent Liabilities

In 2008 the Group adopted the Manual on Assessment and Recognition of Loans, Receivables and Provisions which specifies the criteria for assessment and recognition of corporate and retail loans, receivables and reservations, in accordance with Internal methodology of the Bank. The first absolute application of assessment and provision based on internal methodology of the Bank took place in year 2007.

3.9. Securities

3.9.1. Securities held for trading

Securities held for trading are comprised of shares and "old foreign currency savings bonds", and are disclosed at market value.

3.9.2. Securities held to maturity

Securities held to maturity are initially stated at cost and at balance sheet date securities held to maturity are stated at amortized cost, or present value of future cash flows, using the contractual interest rate, since current market interest rate is not available.

3.9.3. Securities available for sale

Securities available for sale are comprised of equity investments of other banks, associates and other entities.

Equity investments that relate to the listed securities of other legal entities are stated at market value, as of the balance sheet date. Equity investments for which an active market and reliable market values do not exist are stated at cost less allowances for impairment.

Equity investments of associated legal entities are stated at cost.

TRANSLATION

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3.10. Cash and cash equivalents

For purposes of the Statement of Cash Flows, "Cash and cash equivalents" include cash and balances on the current accounts held with the central bank and other banks, as well as cheques in the course of collection.

3.11. Funds managed on behalf of third parties

Assets for business operations conducted on behalf of third parties that are managed by the Group are not included in the Group's balance sheet, but under off-balance sheet items.

3.12. Taxes and contributions

3.12.1. Corporate income tax

The Parent Bank is unable to perform tax consolidation based on regulations effective in the Republic of Serbia.

Current income tax represents the amount calculated in accordance with the defined tax rate. The taxable base includes the profit stated in the statutory statement of income in accordance with IAS/FIRS, adjusted for permanent differences between defined and effective tax rate.

The annual corporate income tax of the Group's members is payable at the prescribed rate on the tax base reported in the annual income tax return. (Note 18)

| The tax rates for 2008 are: | |
|-----------------------------|-----|
| Serbia | 10% |
| Montenegro | 9% |
| Bosnia and Herzegovina | 10% |

3.12.2. Taxes and contributions not dependant on results

Taxes and contributions that are not dependant on results comprise property tax, value added tax, taxes and contributions for salaries charged to the employer, as well as other taxes and contributions in accordance with tax legislation and general regulations. These taxes and contributions are reported under other operating expenses.

3.13. Fair value

In the Republic of Serbia, the Republic of Montenegro and the Republic of Bosnia and Herzegovina there is no market experience, stability and liquidity for the sale/purchase of loans and other financial assets and liabilities and the official market information are not available at every moment. For the purpose of fair value determination, future cash flows are discounted at present value using discount rate equal to the contracted interest rate, which discounts present value to nominal value. Provision is made in the amount of the estimated risks that the book value will not be realized.

3.14. Employee benefits

The Group does not have its own defined benefit plans or share-based remuneration options as at 31 December 2008.

The Group made provisions in compliance with IAS 19 in proportion to long-term liabilities for retirement benefits. Provision for retirement benefits is calculated by independent certified actuary.

TRANSLATION

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3.15. Appliance of new sublegal acts of Law on accounting and auditing

In the year 2008, National Bank of Serbia adopted new Regulation on chart of accounts and account's content in chart of accounts for Banks and Regulation on form and content of items in forms of financial statements for Banks.

The Group applied mentioned acts and conducted appropriate reclassifications for previous year financial statement items.

3.16. Segment information

The Group performs most of its operations in the Republic of Serbia.

The balance sheet assets of the Parent Bank amount to 90.83% of the consolidated balance sheet assets.

Segment information is presented in note 51.

Analysis of the Group's placements in respect of the industry concentration is presented in Note 24.

4. INTEREST INCOME AND EXPENSES

The Group estimated that it is not expediently to reclassify interests for previous year on the basis of new chart of accounts considering that in 2007 chart of accounts based on sector qualification of the client was applied.

a) Interest income

| | 31 December | | |

Komercijalna banka AD Beograd

The obligatory reserves represent a deposit required by the National Bank of Serbia ("NBS"), which is calculated and deposited with the NBS in accordance with the Decision on Obligatory Reserves of Banks with the NBS and is held on the Bank's giro account. Obligatory reserve in dinars may be used for liquidity purpose.

In accordance with NBS requirements, the Bank is obliged to maintain a monthly average of funds on its giro account above the amount of obligatory reserve for that month. The Bank must maintain a minimum average monthly balance on its giro account in the amount of the calculated mandatory dinar reserve, and an average daily balance in the amount of 100% of the calculated mandatory dinar reserve.

In period from 18 December 2008 to 17 January 2009 the Bank did not achieve the minimum average monthly balance for reserve in dinars. As a consequence, the Bank had to pay penalty interest to the National Bank of Serbia in the amount of RSD 4,073 thousands.

The Bank did not exceed prescribed limits in respect of obligatory reserve during 2008. The NBS pays interest on average obligatory reserves in dinars at an interest rate of 2.5% p.a.

Komercijalna banka AD Beograd

The obligatory reserve in foreign currency represents a minimum deposit required by the NBS, which is calculated and deposited with the NBS in accordance with the Decision on Obligatory Reserves of Banks with the NBS and is calculated on the average daily amount of foreign currency deposits and certain other foreign currency liabilities in the preceding month. The Bank is obliged to keep 40% of obligatory reserve in foreign currency on its current account in dinars.

In period from 18 September to 17 October 2008 the Bank did not achieve the minimum average monthly balance for obligatory reserve in foreign currency. As a consequence, the Bank had to pay penalty interest to the National Bank of Serbia in the amount of RSD 4,098 thousands (EUR 45,943.63).

The obligatory reserve in foreign currency is non-interest bearing.

Komercijalna banka AD Budva

The obligatory reserve at Central Bank of Montenegro represents reserve of funds calculated in accordance with the Decision on obligatory reserve at Central Bank of Montenegro. 50% of reserve can be used for maintaining daily liquidity at rate of 11% per annum if the funds are not returned the same day.

For calculation of obligatory reserve differential rates are applied, for a vista deposits and time deposits up to 180 days at rate of 18% and for time deposits over 180 days at rate of 2%.

In accordance with the Law on measures for protection of banking system which was adopted by Parliament of Montenegro (Office Gazette of Montenegro no. 64/08 from 27 October 2008), the Bank that have liquidity problems during financial crisis can use up to 50% of obligatory reserve funds deposited at Central Bank of Montenegro for period longer than one day, and no longer than seven working days within one month, at interest rate of 5% per annum.

The Bank did not use it's obligatory reserve during year 2008. Annual interest rate of Central Bank of Montenegro on 50% of accomplished average daily balance of obligatory reserve funds was 1%.

Komercijalna banka AD Banja Luka

In accordance with the Central Bank of Bosnia and Herzegovina's Decision on Reserve Requirement, the Bank is required to calculate and maintain an 18% obligatory reserve for deposits and borrowed founds. This reserve can be used for liquidity. Central Bank of Bosnia and Herzegovina pays fee on total amount of funds at Central Bank at rate of 1%.

Risks and Uncertainties

The Gropu's management recorded allowances and provisions for all known and estimated risks as of the date of the financial statements. The Group's loan portfolio contains a number of customers that are involved in the privatization and/or restructuring processes, which are expected to render either partial or complete recoveries of the Gropu's receivables. The receivables from such customers were classified as of the most recent available information on their financial situation, and the expected course of their respective restructuring processes. In the event that such debt recovery efforts prove to be unsuccessful, the respective receivables are primarily collateralized by real estate, industrial land, buildings and equipment. In the case that the debt recovery actions undertaken by the Group's management are unsuccessful, additional amounts of allowances for impairment and provisions for contingent liabilities would be required in the forthcoming reporting periods.

As at 31 December 2008 the Group is using equipment acquired under finance lease agreements having a net book value of RSD 65,920 thousands, while finance lease liabilities amounted to RSD 54,873 thousand as at 31 December 2008.

The Group has not pledged as collateral any of its property as at 31 December 2008.

As a result of incomplete land register books, the Group's property stated in the amount of RSD 732,371 thousand as at 31 December 2008 has not been duly recorded in the land register. The Group's management is undertaking actions to obtain the appropriate property registration documents.

As at 1 January 2005 the Group booked revaluation (valuation by an independent and certified appraiser) of property. Revaluation model will be used for measurement of property in the future.

29. PROPERTY AND EQUIPMENT AND INVESTMENT PROPERTY (continued)

Based on opinion of expert team, the Group decided that there is no need for independent property valuation for the year 2008.

Management of the Group believes that present value of property and equipment as at 31 December 2008 is stated at its market value.

Based on yearly stock count, the Group disposed fixed assets in amount of RSD 5,297 thousands.

Komercijalna banka AD Beograd

Material assets received as collection of receivables in the amount of RSD 23,802 thousand relate to:

- Business premises in Novi Pazar, Kej skopskih žrtava 44 in the amount of RSD 9.156 thousand (82.95 sqm)

- Gnjilica, 7th class acre, in the amount of RSD 211 thousands (2.638 sqm)

- Agricultural household valued at RSD 14,043 thousands

- Equipment (Novi Pazar), valued at RSD 392 thousands

32. OTHER ASSETS (continued)

For mentioned properties the Bank holds ownership that is not registered in the land registry. The Bank's management is undertaking actions to sell the mentioned property.

In accordance with NBS regulations for material assets received as collection of receivables the Bank is under obligation to dispose of them or to deploy them for its own use within twelve months of the date of acquisition. In the event that the prescribed deadline is exceeded the Bank must make a provision of 100%.

Komercijalna banka AD Budva

In accordance with regulations of Central Bank of Montenegro for material assets received as a correction of receivables the Bank is under obligation to dispose of them or to deploy them for it's own use within twenty four months of the date of acquisition. In the event that the prescribed deadline is exceeded the Bank has to ask for approval of the Central Bank of Montenegro to prolonged it. Provision for those assets is 1%.

Assets held for sale in amount of RSD 203,313 thousands comprise of properties received from receivables, by realization of fiduciary on properties.

33. TRANSACTION DEPOSITS

| | 31 December | | |
|-----------------------|-------------|------------|--|
| In thousands of RSD | 2008 | 2007 | |
| - in dinars | 17,357,692 | 18,120,125 | |
| - in foreign currency | 13,543,278 | 11,362,442 | |
| | 30,900,970 | 29,482,567 | |

Transaction deposits in dinars primarily relate to transaction deposits of companies and other legal entities. According to Decision on interest rates adopted in 2008, these deposits are interest- baring. Depending on average monthly turnover on transaction accounts interest rate fluctuates from 0.5 to 2% p.a.

Foreign currency transaction deposits of companies and non-residents are non-interest bearing, except in case of specific business arrangements. Other members of the group have rates at 0.25%.

Retail dinar call deposits are deposited at interest rates to 2.5% per annum. Retail foreign currency call deposits are deposited at interest rates ranging from 1.0% to 1.2% per annum.

34. OTHER DEPOSITS (continued)

Short-term dinar deposits of companies are deposited at interest rates ranging from 8.5% to 10.90% per annum, depending on the date of maturity.

Short-term foreign currency deposits of companies are deposited at interest rates ranging from 1% to 4.70% per month.

Short-term retail deposits in dinars are deposited at interest rates ranging from 7% to 10.00% per annum, and in foreign currency from 1.8% to 6.25% per annum.

Long-term retail deposits in dinars are deposited at interest rates ranging from 12.00% to 16.00% per annum, and in foreign currency from 3% to 7.35% per annum.

Long-term dinar deposits of companies are deposited at interest rates ranging from 10.30 to 10.90% per annum, and in foreign currency from 1.25% to 3.35% per annum.

Komercijalna banka Ad Beograd

The Bank's share capital is formed from initial shareholders' contributions and subsequent issues of new shares, as well as through revaluation up to 31 December 2002. Shareholders hold the rights to manage the Bank, as well as the right to share in its profits.

New XX share issue of ordinary shares was realized on 14 March 2008:

- The Bank realized 34,679 shares with nominal value of RSD 10 thousand per share. Basis for issue of shares is capital increase with right of prior purchase.

Trough this issue the Bank realized share premium in the amount of RSD 3,537,258 thousands.

As at 31 December 2008 share capital consists of 908,282 shares, with nominal value per share of RSD 10 thousands and with following breakdown:

- 870,931 ordinary shares and

- 37,351 priority shares

During 2008 preferential dividends for earlier period were paid out in the amount of RSD 57,726 thousand.

Basic earnings per share amounts to RSD 3,172 thousands or 31,7% of the nominal value of an ordinary share.

The Bank did not issue any other equity instruments, so that diluted earnings per share are equal to basic earnings per share.

Kombank invest

Based on Decision on foundation and share capital increase of the Company, in 2008 two share issues were conducted: - 14.000 shares in nominal value RSD 10,000 per share.

Share capital of the Parent Bank in related entities is consolidated in total.

41. EQUITY (continued)

Liabilities of the Bank that can be converted into capital

Liabilities of the Bank for which management assesses that they can be subject to future share issues and conversion into capital, in accordance with the Law Regulating the Relation Between FRY and Companies and Banks on the Territory of FRY, who are initial borrowers or guarantors toward the Paris and London clubs of creditors, as at 31 December 2008 amount to RSD 5,583 thousand, or USD 36,800.44 and EUR 36,891.72 and are reported under long-term borrowings from foreign banks.

Capital adequacy ratio

The parent bank must maintain a capital adequacy ratio of 12% as prescribed by the National Bank of Serbia, in accordance with the Basel Convention, as required for all banks. As at 31 December 2008 the Bank's capital adequacy ratio, based on financial statements prepared by the Bank's management and methodology set out in National Bank of Serbia's decisions for 2008, amounts to 13.60%.

As at 31 December 2008 the capital of **Komercijalna banka AD Budva** is reconciled according to regulated minimum in Montenegro. Defined minimal amount of capital is EUR 5,000 thousand.

According to Basel Convention and in accordance with Agency for banking of Republic of Srpska, Komercijalna banka AD Banja Luka is obligated to maintain minimum of capital adequacy ratio of 12%. As at December 31,2008 capital adequacy ratio is 15.20% which is above prescribed minimum.

Capital adequacy ratio of the Group according to methodology of NBS as at December 31, 2008 is 14.70 %.

55. RISK MANAGEMENT

1. INTRODUCTORY COMMENTS ABOUT RISK MANAGEMENT

Risk is an inseparable part of banking and is managed through a process of continual identification, measurement, monitoring and setting of risk limits and through other types of control. The process of risk management is of considerable significance for continued profitable operation of the Komercijalna banka AD Beograd Group (hereinafter: the Group).

The Group manages risks with a view to realizing the following objectives: minimising the negative effects on financial result and equity within acceptable risk levels, maintaining the required level of capital adequacy, developing the Group's activities in accordance with business opportunities and market development with a view to gaining competitive advantage.

The practice in the Group, as is the case of all large, developed banking groups, is to separate the risk management function from daily business activities linked with client relations.

Objectives and principles of risk management

The risk management system is set out in the following regulations on the Group level:

- Risk Management Objectives and Principles,
- Risk Management Policies and Procedures,
- Special Instructions for Managing Individual Risks,
- Methodology for Managing Individual Risks.

Risk Management Objectives and Principles of the Group set out:

- Specific definitions of risks that the Group uses,
- Long-term objectives related to an acceptable risk profile and exposure,
- Approaches to individual types of risks,
- Types of risk limits that the Group will use,
- Principles for organising risk management,
- Principles of processes for internal measurement of capital adequacy.

Beside objectives the Group also specified the basic principles of risk management for meeting its long-term objectives:

- Organizing of operation of a separate organizational unit for risk management at Group level.
- Establishing explicit and clear rules for managing individual types of risks, with an associated set of policies and procedures for managing individual types of risks, with appropriate activity objectives at Group level.
- Making business decisions based on quantitative and qualitative analyses that use applicable risk parameters.
- Collection of complete, timely and trustworthy data associated with risk management and provision of adequate resources for data storage and processing.
- Development of a quantitative modeling mechanism that allows for simulation and/or analysis of performance change measurement in business and market environments for the profile of the Group's risk exposure and further influence on the Group's liquidity, profitability and net value.

Policies and procedures for managing individual risks define in greater detail the process of managing risks, identification, measurement, minimising and risk monitoring, and are applied on Group member level.

Competences

The *Managing Board* is authorized and responsible for establishing a uniform risk management system in the Parent Bank and the Group, and for monitoring such system, adopting policies and procedures for risk management, as well as monitoring whether the Parent Bank and the Group acts in accordance with adopted policies and procedures.

The *Executive Board* is authorized and responsible for the process of identification, assessment (estimation), monitoring and control of risks to which the Parent Bank and the Group are exposed, as well as for implementation of risk management policies and procedures.

The *Audit Committee* is authorized and responsible for continued monitoring of application of risk management policies and procedures and for implementing the system of internal controls at the Parent Bank and the Group level.

TRANSLATION

The *Asset Liability Committee* is authorised and responsible for monitoring the risk exposure resulting from the structure of its receivables, liabilities and off-balance sheet items, as well as for proposing measures for managing interest and liquidity risks.

The *Credit Committee* is responsible for loan approvals and maintaining optimal exposure to credit risk.

The *Risk Management Committee* is authorised and responsible for professional implementation of models and methodologies for identifying, measuring, monitoring and controlling risks, as well as for implementing and monitoring risk management procedures.

The *Asset Management Division* is responsible for managing assets and liabilities, their overall financial structure, and is primarily responsible for interest and liquidity risks, while the Financial Institutions Division is responsible for currency risk.

The *Internal Audit Division* is authorized and responsible for continual monitoring of implementation of risk management policies and procedures, and tests the adequacy of procedures and the Group's compliance with them. Internal Audit reports its findings and recommendations to the Audit Committee and the Managing Board.

Risk measurement and reporting

The Group measures risk exposure using methods that reflect expected losses that can arise under normal circumstances, and unexpected losses that represent an estimate of the ultimately realized loss based on statistical models. These models use probabilities that are based on historical experience. The Group also simulates scenarios that could arise in the event that extreme events do actually occur for which the probability of occurrence is not very high.

Risk monitoring and control is based on limits, while they in turn depend on business strategy and the business environment, as well as on the level of risk that the Group is ready to accept.

The Parent Bank and the Group members regularly submit reports on risk management to the Managing Board, Executive Board, Audit Committee, Asset Liability Committee and Credit Committee. Reports include all relevant information for risk assessment and decision making.

On a monthly basis, the Group members report to the Risk Management Committee of the Parent Bank and other competent organizational parts, and organizational part in charged for risk management in the Parent Bank reports to the Managing Board, Executive Board and Audit Committee about risk management on consolidated basis.

Types of risk

The Group is exposed to the following risks in particular: credit risk, liquidity risk, market risk and operating risk. Market risk comprises currency risk, interest rate risk and other market risks.

The process of independent control of risks does not include business risks such as changes in the environment, technology and industry, which are controlled by the strategic planning process.

2 CREDIT RISK

Credit risk is defined as the risk that liabilities will not be settled in respect of occurred debts, where the debtor will not pay principal, interest and processing charges. Given that loaning of funds to clients is the Group's core commercial activity, quality and timely analysis and credit risk management increase operating reliability.

Credit risk comprises:

- Default risk the risk of loss that can arise if a debtor fails to settle liabilities;
- Downgrade risk the risk of loss that can arise if risk level of a debtor is downgraded (downgraded credit rating) under assets items that are recorded in the banking book;
- Risk of change in value of assets the risk of loss that can arise on assets items that are recorded in the banking book in the event of a
 drop in their market value with respect to the price at which assets were acquired;
- Exposure risks risks that can arise from the Group's exposure toward a single individual, a group of related parties or to entities that are associated with the Group.

The Group takes measures to guard against credit risk by identifying, measuring, minimising and monitoring credit risk, both at the level of individual placements and at overall portfolio level.

The actual process of credit risk management consists of:

- assessment of credit rating and financial position of the client;
- assessment of placements collaterals;
- linking interest rates to the risk group to which the client belongs;
- application of criteria that are defined by the internal rating system;
- setting of limits for approval of placements for particular clients;
- setting of limits for approval of placements;
- monitoring of collection of interest and principle during the repayment period;
- client monitoring;
- placement risk management;
- portfolio management;
- internal and external reporting;
- conducting of the process of internal assessment of capital adequacy.

In its effort to manage credit risk the Group seeks to do business with clients that have good credit rating and to acquire appropriate collaterals as security for repayment. Each member of the Group regularly monitors its debtors, placements and collaterals, in order to be able to undertake appropriate activities for the purpose of collecting its receivables.

The Group defines limits of exposure per individual types of risk with the objective of limiting and minimising risks to acceptable levels for the Group's risk profile. The Group's exposure limits to individual borrowers are based on the assessment of a borrower's credit rating. The Group's exposure limits at portfolio level are directed at limiting exposure concentrations in the portfolio. In case of internal limit breach, the Group members submit explanations with measure suggestions and activity plans, and the Parent Bank reports to the Executive Board of the Parent Bank. The Group members are obliged to report to the Parent Bank if any extraordinary situation occurs due to deterioration of local markets, political and economic instability, etc.

Credit risk measurement is based on two parallel approaches:

- regulatory approach (in accordance with the local legislation of the Group member country),
- internal approach (clearly defined on the Group level in order to aggregate the risks to which the Group is exposed).

The approach which is based on internally developed methods assumes that the Group manages portfolio structure in a way that objectively assesses the need for placement impairment in accordance with International Accounting Standards, International Financial Reporting Standards and internal methodology, and definition of acceptable risk level which is deemed acceptable to the Group.

The Group has developed an internal rating system which is regularly reviewed and developed.

Overall credit risk exposure

Overall credit risk exposure is expressed as a gross amount, before minimising effects of collaterals and impairments.

| Overvie | ew of overall credit risk exposure | | RSD 000 |
|---------|---|-------------|-------------|
| | | 2008 | 2007 |
| Ι. | Placements | 132,070,657 | 105,346,106 |

| 2. | Equity investments | 661,302 | 977,924 |
| III. | Off-balance sheet items | 26,768,766 | 24,518,439 |
| 1. | Guarantees | 10,260,066 | 8,563,798 |
| 2. | Other | 16,508,700 | 15,954,641 |
| | Total gross book value | 159,634,272 | 131,087,204 |

Downgrade risk

The quality of the Group's assets is measured by the level of exposure to individual risk categories according to internal rating system criteria. A low level of risk implies doing business with clients with a high credit rating (risk categories 1 and 2), increased level of risk implies doing business with clients with a high credit rating (risk categories 1 and 2), increased level of risk implies doing business with clients with a high credit rating (risk categories 1 and 2), increased level of risk implies doing business with clients with a high credit rating (risk categories 1 and 2), increased level of risk implies doing business with clients with a high credit rating (risk categories 1 and 2), and a high level of risk characterizes clients with negative operating results and poor credit rating (risk categories 4 and 5).

TRANSLATION

The Group guards against downgrade risk through continual monitoring of clients' business operations and identifying changes that could arise through: deterioration of a borrower's position, delays in repayment and changes in the business environment, as well as securing of appropriate collaterals.

Risk of change in value of assets

Impairment of placements is intended to ensure reasonable, cautious and timely registering of losses, in order to protect the Group's capital in the period when the loss occurs and is definitely confirmed (realised), due to inability to collect contracted amounts or through outflow of assets to settle contingent liabilities.

Impairment of placements and provisions are made when there is justification and objective proof of impairment as the result of events that occurred after initial recognition of a loan, and that have a negative effect on future cash flows associated with a loan.

Key elements in assessing impairment of placements are as follows:

- are repayments of principal or interest overdue,
- does the loan beneficiary have cash flow difficulties,
- has credit rating deteriorated or has a change occurred in initial terms of contract, etc.

Assessment of impairment of receivables

The Group assesses impairment of placements on an individual and on a group basis.

Individual assessment

The Group assesses impairment of each individually significant placement and considers sustainability of a loan beneficiary's business plan, his ability to improve performance in the event of financial difficulties, income forecasts, availability of other financial support and collateral value which can be realized, as well as scheduling of expected cash flows.

Group assessment

Impairment is assessed on a group basis for placements that are not individually significant and for individually significant placements and advances, when there is no objective evidence of individual impairment. Impairment losses are assessed by considering the following information: historical losses in the portfolio, current economic conditions, compensation of impairment.

Impairment of placements is based on assessment of expected future cash flows from doing business with a client, as well as from collateral realisation, if it is assessed that loans can be realistically settled from such assets.

Impairment of loans decreases the value of loans and is recognised as an expense in the income statement.

Due receivables comprise all due receivables and interest and processing charges receivables.

Assessment of provisions for off-balance sheet items

Assessment of provisions for off-balance sheet items (contingent liabilities) is performed when it is estimated that the expectation is fairly certain that an outflow of assets will occur for settling contingent liabilities.

TRANSLATION

In assessing provisions for contingent losses on off-balance sheet items, assets resulting from collateral realisation are recognised if it is completely certain that cash outflows for contingent liabilities will be settled from collaterals.

Default risk

Total receivables from borrowers that are overdue for longer than 90 days are considered risk placements, including placements to clients with whom changes have been noted that could significantly impact ability of settling the borrowers' liabilities.

The Group undertakes the following measures for settling receivables:

- Out of court settlement.
- Confiscation of goods and real-estate property in order to collect the Group's receivables.
- Sale of receivable.
- Concluding a contracted with an interested third party.
- Reprogramming or restructuring.
- Initiation of court proceedings.

In the event that measures undertaken for settling placements, including forced collection and initiation of court proceedings, do not give the desired results, and when it is not possible to collect a receivable in full, recommendation is made for write-off of the remaining part of the receivable.

Collateral

For the purpose of guarding against credit risk exposure, besides regular monitoring of a client's business, the Group acquires collaterals which it uses to secure receivables and to minimize credit risk. Depending on the assessment of ability to settle contractual liabilities, the level of coverage of a placement is defined such that in case of client default, activated collateral can be used realistically to settle a receivable. The quantity and type of collateral depends on the assessed credit risk.

As a standard type of loan security the Group receives from clients contractual authorizations for account withdrawals and bills of exchange, while additional collateral is contracted, depending on credit risk assessment:

- for corporate loans pledges over movable and immovable property (mortgages), deposits, bank and corporate guarantees, securities, etc
- for retail loans residential building mortgages, deposits, insurance from the National Mortgage Insurance Corporation.

Each member of the Group monitors the market value of collaterals and, when needed, it can require additional collateral based on terms of contract.

The Group's policy is that receivables can be settled from collaterals and proceeds can be used to reduce or repay a debt. The Group does not use confiscated property for business purposes, except under special circumstances.

3 LIQUIDITY RISK

Liquidity risk represents the risk of occurrence of negative effects on the Group's financial result and capital as a result of the Group's inability to settle its matured liabilities. With a view to minimising liquidity risk the Group diversifies its sources of assets, manages cash flows, and monitors future cash flows and liquidity on a daily level. An important component of managing liquidity is assessment of market approach and analysis of different financing options.

KOMERCIJALNA BANKA AD BEOGRAD

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS 31 December 2008

TRANSLATION

The matching and controlled mismatching of the maturity and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks ever to be completely matched since business transacted is often of an uncertain term and of varying types. An unmatched position potentially increases profitability, but also the risk of loss.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, the interest bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest and exchange rates.

The Group members monitor liquidity in a daily basis, submitting reports which comprise data on assets in domestic and foreign currency, amount of obligation reserve, movements in deposit potential, expected cash flows and other relevant information for liquidity management.

The Group's liquidity level is measured through monitoring of movements in deposits and loans maturity using GAP and Ratio analysis, as well as making cash flow scenarios.

The Group's liquidity level is monitored via liquidity ratio, which represents the ratio between the sum of liquid receivables of the first and second order (cash, cash on accounts held with other banks, deposits with the central bank, receivables in the process of collection, irrevocable lines of credit granted to the members of the Group, financial instruments quoted on the stock exchange and other receivables of the Group that are due in under one month) and the sum of call deposit liabilities without a contractual date of maturity that fall due within one month of the date of calculation of the liquidity ratio, such that it:

- amounts to at least 1.0 when calculated as the average of all working days,
- amounts to at least 0.8 when calculated for the working day,
- cannot be below 0.9 for longer than three consecutive days.

The Parent Bank defined a Liquidity Management Plan for Crisis Situations with a view to ensuring business continuity in the event of occurrence of serious disruptions in operation. The Group members also defined plans for crisis situations and liquidity management strategies. Depending on the sequence of undesirable events the Group members can be faced with a less serious or more serious liquidity crisis, when applying activities and measures specified in these plans.

The liquidity ratio of the Group was as follows:

| | 31.12.2 | 2008 | | 21 | .12.2007 | |

| Discrepancy as at 31.12.2008 | (1,678,035) | (32,922,784) | (2,706,488) | 36,297,697 | 1,009,610 | - |

The overview on maturity structure of assets and liabilities on consolidated basis presents balance sheet positions that are divided by specified maturities from balance sheet date to contractual date of maturity. The Group Management is of the opinion that diversity of deposits by number and type of depositors, as well as previous experience of the Group offer a sound basis for the opinion that deposits represent a long-term and stable source of financing, and in this respect significant outflow of assets that could jeopardize the Group's liquidity is not expected.

4 MARKET RISK

Market risk represents the possibility of occurrence of negative effects on the Group's financial result and equity due to changes in market variables and comprises interest rate risk, currency risk and other market risks. Other market risks comprise risks of fluctuation in the price of securities, counterparty risk and the risk of delivery on commitments related to items in the trading book.

Interest rate risk

Interest rate risk represents the possibility of occurrence of negative effects on the Group's financial result and equity due to interest rate fluctuations.

The objectives of the Group's policies related to interest rate risk management are to maximise return at specified risk levels, to minimise negative effects on financial capital, to maintain the economic value of capital and to develop the Group's activities in accordance with business opportunities and market development, all with the objective of realising a competitive advantage.

One of the key points is the Group's focus on the interest margin, given that all fluctuations in the margin of internal return represents a potential indicator of interest rate risk, where the Group manages this margin through credit and deposit pricing.

The Group measures interest rate risk exposure by using GAP analysis, ratio analysis and interest rate fluctuations scenarios. Measurement of interest rate risk using GAP analysis is based on analysis of matching between interest sensitive assets and liabilities per periods when interest rate is set (for items with market sensitive interest rates) and between maturities (for items with variable and fixed interest rates).

The Group members manage interest rate risk in its operations by using the following methods:

- Daily monitoring of interest rate fluctuations on domestic and foreign markets;
- Matching of maturities of placements and sources of funding.

Interest rate risk management ensures that the Group will have uniformity in changes in interest rates on assets and liabilities.

The interest rate risk GAP as at 31 December 2008 was as follows:

| The interest rate risk GAP as at 31 | December 2008 w | as as ioliows | | | | | K2D 000 |

Currency risk

Currency risk represents the possibility of occurrence of negative effects on the Group's financial result and equity due to fluctuations in exchange rates between currencies, fluctuations in the domestic currency with respect to foreign currencies or changes in the value of gold and other precious metals. All items in the banking book and the trading book that are denominated in a foreign currency are exposed to currency risk.

The basic objectives of managing the Group's currency risk is to maximise return at specified risk levels, to minimise negative effects on financial capital, to maintain the required level of capital adequacy and to develop the Group's activities in accordance with business opportunities and market development, all with the objective of realising a competitive advantage.

The Group measures currency risk exposure by regularly monitoring the currency risk indicator, as well as by preparing scenarios for impacts of exchange rate fluctuations on financial result and equity.

The currency risk indicator is expressed in percentages as the ratio between the Group's total foreign currency balance and the Group's equity. The Group's total foreign currency balance represents the higher of the absolute value of the long open foreign currency position or of the short open foreign currency position, including the absolute value of the net open foreign currency position in gold. The Group is required to maintain its assets and liabilities such that its total net foreign currency balance (including the absolute value of the foreign currency in gold) at the end of each working day must not exceed 20% of the Group's equity.

Also, the Group prepares scenarios to analyse the effects of exchange rate fluctuations on financial result and equity.

The currency risk indicator on consolidated basis as at 31 December 2008 amounted to 19.69% (prescribed value 20%).

| The table below presents the Group's currency exposure as at 31 December 2008: | | | | | | | | RSD 000 | | |

Exchange rates

Exchange rates applied in converting balance sheet items into dinars (RSD) as at 31 December 2008 and 2007 for particular currencies were as follows:

| | 2008 | 2007 | |
|-----|---------|---------|--|
| EUR | 88.6010 | 79.2362 | |
| USD | 62.9000 | 53.7267 | |
| CHF | 59.4040 | 47.8422 | |

5 OPERATING RISK

Operating risk represents the possibility of occurrence of negative effects on the Group's financial result and equity due to employee errors, inadequate procedures and processes in the Group, inadequate management of information and other systems in the Group, as well as occurrence of unforeseen external events.

Operating risk is defined as an event that occurred as the result of inappropriate or unsuccessful internal processes, employee and system actions or system and other external events, internal and external abuses, hiring and security practices at the work place, client receivables, product distribution, fines and penalties for infractions, damage incurred to property, disruptions in operations and system errors, process management.

The Group monitors operating risk events according to the following business lines: corporate financing, trade and sales, retail business, corporate banking, payments and calculations, agency services, asset management services and retail brokering services.

The Group monitors operating risk events daily and manages operating risks through the process of identification, measurement, minimising, monitoring and reporting of operating risk. The Group appoints employees who are in charge of operating risk with the objective of monitoring operating risk in its every organisational part, where such employees are responsible for accuracy and timeliness of information about all operating risk events that occur in their organisational unit, as well as for keeping records about all occurred events in the operating risk database. The organisational part of the Group which is responsible for risk management monitors and reports operating risks.

Measurement and assessment of operating risk at the Group is done through quantitative and/or qualitative assessment of identified operating risk. The Group measures operating risk exposure through event records and self-assessment.

Event records consist of gathering and analysis of operating risk information relating to the Group's operations that resulted in losses, as well as events that could have resulted in loss. Losses are recorded at gross and net amounts, namely in the total amount of loss realised by the Group, while the net amount signifies the gross loss amount reduced for direct compensation or insurance claim settlement.

Self-assessment consists of assessment of risk exposure by organizational units in accordance with the map of identified operating risks, by measuring potential time gap and frequency between events that could result in loss.

Basic measures of protection against operating risk consist of applying and respecting the "four eye principle", consistent application of internal procedures, control and special monitoring by internal audit.

6 EXPOSURE RISK

Exposure risk represents exposure of the Group and the Group members to:

- a single party
- a group of related parties
- to a party that is associated with the Group.

During 2008 the Group respected prescribed limits:

- The Group's exposure to a single party or group of related parties did not exceed 25% of the Group's equity.
- The Group's exposure to a party that is associated with the Group did not exceed 5% of the Group's equity,
- Total exposure to the Group's related parties did not exceed 20% of the Group's equity.
- The sum of significant exposures as at 31 December 2008 amounts to 70.57% of the Group's equity (max 400% of the Group's equity).

7 COUNTRY RISK

Country risk represents the possibility of occurrence of negative effects on the Group's financial result and equity due to inability to collect receivables from abroad and is caused by political, economic and social conditions in the borrower's country of origin.

Political-economic risk relates to the likelihood of occurrence of losses due to the inability to collect the Group's receivables because of deterioration in macroeconomic stability, due to limitations prescribed by government regulations or due to other structural changes in the economy of the given country.

Transfer risk relates to the probability of occurrence of losses due to the inability to collect receivables in a currency which is not the official currency in the borrower's country of origin.

Measurement of country risk is made per individual placements and at the Group's portfolio level. Measurement of exposure of an individual receivable to country risk is based on the country rating of the Group's borrower's country of origin as defined by internationally recognized agencies, while measurement of portfolio exposure to country risk is done by grouping receivables by level of development of the borrower's country of origin.

The Group sets exposure limits of the Group by countries or regions with the objective of controlling country risk.
